

Sajid Hossain

FULL-STACK WEB DEVELOPER

Email: sajidhossain8272@gmail.com | Phone: +8801329530468
Location: Dhaka, Bangladesh | [LinkedIn](#) | [Portfolio](#) | [GitHub Profile](#)

PROFESSIONAL SUMMARY

Full-Stack Web Developer specialized in building high-performance web applications and developer tools using React.js, Next.js, Node.js, and TypeScript. Experienced in client-side browser processing, automating operational data workflows, and delivering production platforms that drive measurable client business growth. Seeking Full-Stack or Frontend Software Engineer roles.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Web Accessibility (a11y), Responsive Design, SEO
Backend & Databases: Node.js, Express.js, REST APIs, GraphQL, MongoDB (Aggregation Queries), Prisma DB, Firebase
DevOps, Testing & Tools: Docker, GitHub Actions (CI/CD), AWS, GCP, Jest, React Testing Library, Git, Postman, n8n

PROFESSIONAL EXPERIENCE

Software Developer – [Panorama Management Advisory Services](#) (Hybrid), Dhaka, Bangladesh

Oct 2024 – Mar 2026

- Co-built an automated assessment reporting system using Next.js, Node.js, and Google AI Studio APIs, reducing audit report turnaround from days to 1–2 hours.
- Developed core user interfaces and form workflows in React.js and TypeScript for the [Panorama Assessment Tool](#), transitioning an internal Excel process into a web application.
- Configured automated data pipelines using n8n workflows and REST endpoints to process assessment submission data across internal platforms.
- Set up Docker containers and GitHub Actions CI/CD deployment pipelines for cloud deployments on AWS and GCP.
- Wrote unit and component tests using Jest and React Testing Library to verify assessment calculation modules.
- Optimized MongoDB queries and database indexing using Prisma DB schema definitions, improving API response times across client modules.

Software Associate – Panorama Management Advisory Services, Dhaka, Bangladesh

Mar 2024 – Oct 2024

- Executed manual and component QA tests for front-end web features, reducing post-release bug reports by 30%.
- Authored Standard Operating Procedures (SOPs) and technical API documentation to standardize team onboarding workflows.
- Tracked Core Web Vitals using GTmetrix and Google Analytics to fix UI rendering slowdowns and improve accessibility.

FEATURED PRODUCTION PROJECTS

Plzwork (Quick Convert Engine) [Live Site](#) | [Repository](#)

TypeScript • Next.js • React • Tailwind CSS

- Problem & Solution:** Developers and creators need privacy-first, bulk client-side file conversion without uploading sensitive images to external servers.
- Implementation:** Built **Quick Convert** using client-side Canvas and File APIs to batch process image files directly in the browser, eliminating server bandwidth costs while maintaining strict data privacy (throughput scales with host hardware).

GrafiXr – Production Digital Portfolio Platform [Live Site](#) | [Repository](#)

TypeScript • Next.js • Express.js • Cloudinary • MongoDB

- Problem & Solution:** A professional digital designer required a dynamic, high-performance portfolio platform to replace static site showcases and manage client project updates.
- Implementation:** Built a full-stack platform and dynamic admin portal with Next.js, Express.js, MongoDB aggregation queries, and Cloudinary media optimization, supporting ~2x growth in client inquiries and sales bookings via enhanced presentation and SEO.

QUULIX – Full-Stack E-Commerce Platform [Live Demo](#) | [Repository](#)

TypeScript • Next.js • Node.js • Prisma DB • MongoDB

- Problem & Solution:** Modern e-commerce storefronts require fast product catalog filtering, secure user workflows, and dynamic state synchronization.
- Implementation:** Developed a full-stack shopping application using Next.js, Node.js, GraphQL, Prisma DB over MongoDB, Docker builds, and GitHub Actions CI/CD pipelines.

notepad-os – Offline-First Markdown Editor [Repository \(MIT License\)](#)

TypeScript • React • Offline Storage

- Problem & Solution:** Users require a lightweight, private markdown editor that preserves notes locally without cloud reliance or tracking scripts.
- Implementation:** Built an offline-first markdown notepad in React and TypeScript using browser local storage for instant state persistence.

EDUCATION & TRAINING

BSc in Computer Science & Engineering – Northern University Bangladesh, 2021 – 2024

- Complete Web Development Course – Programming Hero, 2025
- English for Career Development – Coursera / University of Pennsylvania, 2021

ADDITIONAL INFORMATION

Languages: English (Fluent), Bangla (Native), Hindi (Conversational)

Focus Areas: Browser Processing APIs, Full-Stack Architecture, Developer Tools
